Bringing versatility to your procedures

By giving you the ability to switch to single-needle access at any time during a therapeutic plasma exchange (TPE) procedure, we help you provide exceptional patient care.

PROCEDURE AND SYSTEM HIGHLIGHTS

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single-needle software</td>
<td>Allows you to choose the single-needle option at the beginning or at any time during the procedure</td>
</tr>
<tr>
<td>No additional hardware</td>
<td>Eliminates the need for a single-needle flow controller and disposable bag</td>
</tr>
<tr>
<td></td>
<td>Makes the transition to single-needle access simple, with minimal setup time and no loss in system mobility</td>
</tr>
<tr>
<td>Reliable performance</td>
<td>Delivers plasma removal efficiency equivalent to dual-needle access procedures</td>
</tr>
<tr>
<td></td>
<td>Utilizes the same platelet sparing technology as with dual-needle access</td>
</tr>
<tr>
<td>Intuitive graphical user interface</td>
<td>Guides you through each step of the procedure</td>
</tr>

</table>

“Y” CONNECTOR

This small disposable is the only additional item needed to perform TPE with single-needle access. It includes three easily removable end caps.
How it Works

The intuitive graphical user interface guides you through each step of the procedure. The examples below demonstrate the ease of setting up and running TPE with single-needle access.

**SELECTING THE SINGLE-NEEDLE OPTION**

Simply select “Yes” to choose single-needle access at the beginning or at any time during the procedure.

**ATTACHING THE CONNECTOR**

On-screen instructions and diagrams guide you through attaching the single-needle “Y” connector.

**MONITORING THE PROCEDURE**

Once you select the single-needle option, this icon indicates the system is operating in the single-needle mode.
Working with you

Each and every interaction we have with you is important. By fostering open and ongoing relationships, we bring more value to you and the patients we’re all focused on serving.

Even after the technology is in place, we continue to serve you with:

- Education and training
- Technical support
- Clinical and scientific support
- Customer support
- Users groups and professional networks
