

TSCD-II + TOMEs: Empowering Efficiency Through Connected Workflows

Take your lab operations to the next level by combining the **TSCD™-II Sterile Tubing Welder** with **TOMEs™ (Terumo Operational Medical Equipment Software)**, delivering enhanced connectivity and operational efficiency across your workflow.

Compliance

With TOMEs, you can support Good Manufacturing Practices (GMP) by automatically capturing and managing data in one centralized system, helping improve product traceability and recordkeeping without manual data entry.

- **Customize and apply your standard operating procedures (SOPs)**
- **Guide with step-by-step processes**
- **Help ensure blood products are made consistently**

Control

TOMEs enhances process control by standardizing device communication and enabling centralized management of device and program settings across connected devices.

- **Use a PC or tablet to guide operation of the TSCD-II welder**
- **Receive discrepancy alerts**
- **Program protocols via one access point**

Coordination

Better coordination leads to speed, efficiency, and higher productivity. To help, TOMEs limits manual documentation and data entry and fuels information-sharing across systems.

- **Leverage reminders to scan barcodes and inspect welds**
- **Ensure protocol compliance via prompts**
- **Make training easier — no memorizing SOPs**

Connectivity

TOMEs enables data sharing and management through two-way information systems communication — removing the challenges resulting from previously siloed data.

- **Enhance traceability with e-data capture**
- **Transfer data securely and automatically**
- **Improve data access and reporting**

For More Information

To learn more about TOMEs, including integration with TSCD-II and other compatible devices, please reach out to one of our sales representatives or visit TerumoBCT.com/TOMEs.
